ThinkFirst for Youth

Student Evaluation Instructions for Teachers

Please have your students fill out the student evaluation form after you teach a portion of the curriculum. The questions have been designed to be easily understood. However, some students may need additional help to complete the form.

The one area that all students will need assistance with is the box at the top of the student evaluation (see below example). They will need guidance with citing the activity numbers and levels that were taught. On the top right corner of each page in the curriculum manual there are a series of three numbers in the following format:

Lesson Number. Level Number. Activity Number

Please ensure that the students list the corresponding numbers of the lessons they are evaluating. For further information about these numbers, please refer to page 8 of the curriculum manual.

When completed the box should look similar to the example below

Please have your teacher help you fill in the information in this box!

I am in Grade:

I learned ThinkFirst in _____*science*_____ **class.**

The ThinkFirst lesson numbers that were taught to me were:

1.1.1 2.1.1 4.1.6_____
