Diving is a fun activity that people throughout the world engage in. However, diving is not without risk, so take a moment to Think First and participate in a smart way in order to reduce your risk for injury!

**KNOW THE FACTS**

The magnitude of the problem in numbers (1-4):

- In the United States there are approximately 9 million certified divers
- There are 2 fatalities per 100,000 dives
- There are more than 1000 diving-related injuries annually, with over 10% of those being fatal
- In the United States, spinal cord injury (SCI) due to diving is the fourth leading cause of SCI, accounting for 8.5% of overall cases
- SCI following diving accidents range from 1.2–22%
- Most of the SCI due to diving affect the cervical spine

**Types of Diving Injuries** (5-7):

- Barotrauma
- Decompression illness
- Air gas embolism (present in 7 per 100,000)
- Drowning related injuries
- Trauma; cervical spinal cord injury most common injuries

**Risk factors associated with diving injuries** (1, 2, 8-10):

- Males
- Young in age
- Rapid ascents with missed decompression stops
- Improper breathing techniques
- Unfamiliarity with water depth and environment
- Diving alone
- Diving under the influence of alcohol and/or drugs
- Diving at night
- Inexperience

---

**Test Your Knowledge**

Q: What is the most common level of spinal cord injury following diving accidents?

A: Cervical five (10).

Q: What are some symptoms of decompression illness?

A: Joint pain, headache, visual disturbances, erythematous and pruritic skin rash (11, 12).
ThinkFirst about…

... protecting yourself and others from injury!

PREVENTION TIPS (9)
- Enter water feet first to check depth
- Dive in waters you know well
- Complete appropriate training prior to diving
- Dive with others
- Do not dive if one is under the influence of alcohol and/or drugs

WATER SAFETY TIPS (13)
- Learn to swim before getting in the water
- Be aware of your limits
- Swim in supervised areas only
- Do not float where you can’t swim
- Swim with a buddy
- Wear a life jacket when boating
- Stay up-to-date on currents in a lake or ocean
- Monitor the weather
- Do not mess around in the water
- Do not dive into shallow water
