

ThinkFirst Virtual Poster Session Proposals

Due February 12, 2021

**Are You Interested in Sharing Your Research
at a National Conference?**

If you or colleagues have engaged in injury prevention research and would like to share that with fellow injury prevention professionals from around the county, please join us for the virtual poster presentation at ThinkFirst National Conference on **April 6, 2021**,
from 12:00 PM – 12:45 PM.

The virtual poster presentation will allow each poster presenter or research team to spend approximately 5-8 minutes sharing their project and poster with attendees. The conference planning team will select a total of five poster presentations for virtual presentations during the ThinkFirst National Conference.

This is an opportunity to share and highlight the great research occurring in injury prevention. If you are interested in participating, please email Tiffany Bowman at bowmants@health.missouri.edu and provide a brief synopsis of your research (500 words or less).

Poster presentation proposals are due by February 12, 2021.
Selection and notification to accepted poster presenters will be made
by March 1, 2021.
